

The diagram illustrates a cross-section of a bridge deck. The total width of the deck is 193.00 units. The deck is divided into two main sections by a central vertical dashed line. The left section has a width of 3.63 units, and the right section has a width of 2.95 units. The total width of the deck is 193.00 units. The deck is supported by two abutments, each with a width of 4.97 units. The deck is shown with a 1.00% slope, indicated by the text -1.00% and arrows pointing towards the center. The deck is shown with a green line representing the top surface and a black line representing the bottom surface.

Diagram illustrating a cross-section of a road with a 2.00% negative slope. The road width is 193.00. The total width of the road is 5.04. The slope is indicated by a green line and a -2.00% label. The dimensions 2.85 and 2.81 are shown for the top sections.

A cross-section diagram of a road. The road surface is a horizontal line with a 2.00% grade indicated by a downward arrow. The road is flanked by slopes with a 1:4.0 ratio, indicated by '1:4.0' on both sides. The road width is 2.00, and the shoulder width is 1.11. The total width of the road and shoulders is 5.28. The road is 193.00 units long. The road is shown in a perspective view with a dashed line indicating the centerline.

Diagram illustrating a cross-section of a road or embankment. The diagram shows a central vertical axis (dashed line) and two sloped sections. The left side has a slope of 2.00% (indicated by an arrow pointing right). The right side has a slope of -2.00% (indicated by an arrow pointing right). Dimensions are provided for the slopes and the total width:

- Left slope width: 5.12
- Left slope length: 2.11
- Right slope length: 2.42
- Right slope width: 5.03
- Total width (indicated at the bottom): 193.00

Diagram illustrating a cross-section of a road with a 2.00% cross-slope. The diagram shows a central dashed line, a green line representing the ground surface, and a pink trapezoidal area representing the road cross-section. Dimensions include a total width of 193.00, a central width of 5.34, and side widths of 1.67 and 1.89. Slopes are indicated as 1:4.0 on both sides.
